

The table below lists the domain areas measured by the CompTIA Security+™ examination and the approximate extent to which they are represented in the exam:

CompTIA Security+™ Domain	% of Examination
1.0 Network Security	21%
2.0 Compliance and Operational Security	18%
3.0 Threats and Vulnerabilities	21%
4.0 Application, Data and Host Security	16%
5.0 Access Control and Identity Management	13%
6.0 Cryptography	11%
<b>Total</b>	<b>100%</b>

The lab exercises listed as follows are mapped to the appropriate CompTIA Security+™ domain and performance-based exam objective:

- **1.0 Network Security:**
  - Objective 1.2: Apply and implement secure network administration principles:
    - **Lab Exercise 1:** *Network Devices and Technologies - Capturing Network Traffic*
    - **Lab Exercise 2:** *Secure Network Administration Principles - Log Analysis*
  - Objective 1.4: Implement and use common protocols:
    - **Lab Exercise 3:** *Protocols and Default Network Ports - Transferring Data Using TCP/IP*
    - **Lab Exercise 4:** *Protocols and Default Network Ports - Connecting to a Remote System*
  - Objective 1.6: Implement wireless network in a secure manner:
    - **Lab Exercise 5:** *Secure Implementation of Wireless Networking*
- **2.0 Compliance and Operational Security:**
  - Objective 2.3: Execute appropriate incident response procedures:
    - **Lab Exercise 6:** *Incident Response Procedures*
- **3.0 Threats and Vulnerabilities:**

- Objective 3.1: Analyze and differentiate among types of malware
  - **Lab Exercise 7:** *Analyze and Differentiate Types of Malware*
- Objective 3.2: Analyze and differentiate among types of attacks:
  - **Lab Exercise 8:** *Analyze and Differentiate Types of Attacks Using Window Commands*
- Objective 3.5: Analyze and differentiate among types of application attacks:
  - **Lab Exercise 9:** *Analyze and Differentiate Types of Application Attacks*
- Objective 3.6: Analyze and differentiate among types of mitigation and deterrent techniques:
  - **Lab Exercise 10:** *Mitigation and Deterrent Techniques - Anti Forensic*
  - **Lab Exercise 11:** *Mitigation and Deterrent Techniques - Password Cracking*
- Objective 3.7: Implement assessment tools and techniques to discover security threats and vulnerabilities:
  - **Lab Exercise 12:** *Discovering Security Threats and Vulnerabilities*
  
- **4.0 Application, Data and Host Security:**
  - Objective 4.2: Carry out appropriate procedures to establish host security:
    - **Lab Exercise 13:** *Importance of Data Security - Data Theft*
    - **Lab Exercise 14:** *Importance of Data Security - Securing Data Using Encryption Software*
  
- **5.0 Access Control and Identity Management:**
  - Objective 5.3: Implement appropriate security controls when performing account management:
    - **Lab Exercise 15:** *Authentication, Authorization and Access Control*

- **6.0 Cryptography:**
  - Objective 6.2: Use and apply appropriate cryptographic tools and products:
    - **Lab Exercise 14:** *Importance of Data Security - Securing Data Using Encryption Software*
    - **Lab Exercise 16:** *General Cryptography Concepts*
