SHARING VM IMAGES OF CURRICULUM RESOURCES UNDER MSDNAA (June 2, 2011, Microsoft Corporation)
Dr. Arkady Retik Director, WW Tech Faculty Programs, Education Group

To promote greater utility of MSDNAA software among MSDNAA current license holders, this letter extends the rights of use to include the use of MSDNAA licensed copies from other MSDNAA license holders in the form of preconfigured setups in Virtual Machine images. The purpose of this extension is to allow the sharing of preconfigured laboratory exercises and other permitted uses. This extension does not extend the purposes for which the licensed software can be used beyond those detailed in section 2 (see below) of the MSDNAA license

Section 2. INSTALLATION AND USE RIGHTS.

- a. General. One user may install and use copies of the software to design, develop, test and demonstrate your programs. You may not use the software on a device or server in a production environment.
- b. Included Microsoft Programs.
 - i. Except as described in this Sections 2, these license terms apply to all Microsoft programs included with the software or the subscription. If the license terms with any of those programs give you other rights that do not expressly conflict with these license terms, you also have those rights.
 - ii. All Windows Embedded products, which includes the Windows CE Platform Builder programs, and services included with the software are governed by their own license terms, except that one user may install and use multiple copies.
- c. Pre-release and Trial software. Your subscription may contain pre-release and trial software. The license terms included with the pre-release and trial software apply to your use of it.
- d. Device Driver and Software Development Kits, Visual Studio Feature Packs and Patterns & Practices Releases. The software includes components identified as software development kits ("SDK") and device driver kits ("DDK"). If other terms come with an SDK or DDK, those terms apply to your use of it. Your subscription may also contain software components classified as "Visual Studio Feature Packs" or "Patterns & Practices" that are made available to you through MSDN Subscriber Downloads. The license terms accompanying the Visual Studio Feature Packs and Patterns & Practices releases apply to your use of them.
- e. Third Party Programs. The software contains third party programs. The license terms with those programs apply to your use of them.
- f. MSDN Essentials Subscription. You have the right to use the software for as long as your MSDN Essentials Subscription is active.
- g. Subscription Services. In order to access or use subscription services that may be available to you, such as software downloads, technical support and product keys, your subscription must be active.

MS Imagine Premium (MSDNAA) Subscriber Information (Active Subscribers Only)

First Name _____ Last Name _____ Email: _____

Institution _____ Contact Number _____

Address _____ City _____ State _____ Zip _____

Department _____ MS Imagine Premium Subscriber ID: _____

I acknowledge our institution's department and status as an active MS Imagine Premium (MSNDAA) Subscriber and agree to the above disclaimer and terms of use as noted by Microsoft and CSSIA. I accept all liability and also understand that no support will be provided for any images shared including installation and use. Images are provided "as-is" no warranties.

MS Imagine Premium (MSDNAA) Subscriber Administrator Signature _____ Date _____
written signature required
